WHO I AM

Total PC Support was established in September of 2002 to provide an unparalleled level of customer support to PC users throughout Eastern Massachusetts. Aware of the frustrations and inconvenience many PC users experience with typical technical support, Total PC Support provides quality full-service computer support in the comfort of your home or office.

David Bookbinder has been working with Microsoft® based PC's for over 10 years, both as a home user and supporting many large and small businesses. He has worked with such companies as Time/Life, Omnipoint (now T-Mobile), Gillette, John Hancock Financial Services, Digitas, and most recently, Global Partners, Inc. In addition to his experience and know-how, he brings a unique insight into the many problems and frustrations encountered by the typical computer user.
